

means for displaying second information registered with the first information based on the registration information.

2. (Amended) A method for displaying registered information, comprising:  
capturing coded embedded glyph data from a substrate having first image information;  
decoding the coded embedded glyph data to develop registration information; and  
displaying second information registered with the first information based on the registration information.

#### REMARKS

The Examiner's Official Action dated August 1, 2001 has been received and its content carefully noted. This amendment amends claims 1 and 2. Consequently, claims 1-2 are currently pending in the present application. The above amendment with the following remarks is submitted to be fully responsive to the Official Action. Reconsideration of this application in light of these remarks, and allowance of this application are respectfully requested.

In the Official Action, claims 1 and 2 are rejected under 35 U.S.C. §102(b) as anticipated by U.S. Patent No. 5,765,176 to Bloomberg (hereinafter, Bloomberg). This rejection is respectfully traversed for the following reasons.

According to the Examiner, "Bloomberg teaches a document 188 which is scanned to decode the embedded data in a respective one of the iconic images to provide iconic image data 50, then display the iconic image data (col. 12, lines 1-7)." (August 1, 2001 Official Action at page 2.)
